Schematics Organization Summary

In this chapter, each phone model has its own schematics section. In order to view the schematics information for your specific phone, you must know the phone's model.

Note: The 6015i and 6016i have the same schematics because the only difference between the two phones is the A-cover.

Use the following links (or the bookmarks in the left pane of the PDF) to access the schematics for each phone model.

- 6012
- 6015
- 6015i/6016i
- 6019i
